**Text Search Rules and Cross Panel Searches**

"Contains": images containing any words typed (x OR y)	Add the prefix "!" to any word to exclude it from the results.
"Contains All!": images containing all words typed (x AND y)	"+" at beginning of any word triggers the "Starts with" rule for just that word
"Doesn't Contain": images that don't contain any words typed (NOT x OR NOT y)	"+" at end of any word triggers the "Ends with" rule for just that word
"Starts With": images that contain all of the word beginnings typed (x... AND y...)	
"Ends With": images that contain all of the word endings typed (...x AND ...y)	

Cmd+click or Shift+click to select multiple items in any individual panel list or across multiple panel lists. If you have multiple items in a single panel list selected then they are combined in the search as an **OR**, and if you have multiple items selected across different panel lists they are combined using an **AND** search.
